Education

University of Engineering and Management, Jaipur

Aug 2023 – Present

B.Tech CSE (Artificial Intelligence and Machine Learning)– **CGPA: 8.455**

Jaipur, Rajasthan

Sachdeva Public School, Rohini

2009 – 2023

Class 12th (CBSE): 77.2%

Class 10th (CBSE): 82.8%

Rohini, Delhi

Internships

AI Engineering Intern

April 2026

Shift S Consulting - London, England, United Kingdom

- Reduced LLM API costs by 25% by evaluating and integrating open-source models (e.g., LLaMA/Mistral) for production use cases.
- Designed and implemented a voice-based input processing pipeline, converting user speech to structured queries using STT + NLP techniques.
- Collaborated asynchronously with a distributed team across multiple time zones using agile workflows and clear technical documentation.

Deloitte Australia: Data Analytics Job Simulation (Forage)

June 2025 - June 2025

Data Analytics Job Simulation – Jaipur, Rajasthan

- Completed a data analysis and forensic technology simulation, extracting insights that improved investigative accuracy by 30%.
- Built an interactive Tableau dashboard to visualize analytical insights, improving data interpretation efficiency by 25%.

Google Android Developer Virtual Internship

Jan 2024 - Feb 2024

Virtual Internship – Jaipur, Rajasthan

- Completed Google's foundational Android development learning program.
- Learned core Android concepts such as activities, intents, layouts, and app lifecycle.
- Practiced building basic Android applications following Android design guidelines.
- Developed an understanding of Android UI/UX principles and Android app architecture basics.

Projects

VC Search — Startup Data Extraction Pipeline

Mar 2026

Python, BeautifulSoup, Gemini API, Pandas

- Developed a Python-based data pipeline using BeautifulSoup and Pandas to scrape, clean, and transform unstructured HTML data from startup websites into structured datasets.
- Stored processed data in a SQL database to enable structured querying and scalable storage for startup information retrieval.

MoodMirror – AI Emotion Detection Web App

Feb 2026

Python, FastAPI, Scikit-learn, Next.js, React, Vercel, Render

- Developed an AI-powered web application that detects user emotions from text using a TF-IDF vectorizer and trained Scikit-learn classification model.
- Implemented a FastAPI backend with threaded inference handling to prevent request blocking and deployed it on Render.

- Built and deployed a responsive Next.js frontend on Vercel, integrating environment-based API configuration and resolving cross-origin (CORS) communication.

Prescription Analysis Web App

Dec 2023

Python, Flask, Pandas, PyPDF2

- Built a Flask-based application for comparing prescriptions across dosage, medicines, and strength.
- Implemented secure authentication with personalized dashboards.
- Automated PDF parsing and comparison through Pandas workflows.

Technical Skills

Programming Languages: Python, Java, C/C++, HTML/CSS, JavaScript, SQL, Kotlin

Tools: VS Code, AWS S3, Oracle, Microsoft Excel

Technologies/Frameworks: Linux, Git, GitHub, React, TailwindCSS, REST APIs, FastAPI

Positions of Responsibility

GirlScript Summer of Code

Jul 2025 – Oct 2025

Open Source Contributor, UEM Jaipur

- Contributed to 15+ open-source projects.
- Developed SQL-based backend logic in JavaScript architecture to handle high-volume queries.

UEM Jaipur Toastmasters Club

Jul 2024 – Jul 2025

President and Founding Member, UEM Jaipur

- Led collaborations with external clubs and organized 20+ events and meetings.
- Trained 12+ new members in documentation and leadership practices.

Certifications

Database and SQL for Data Science with Python

Oct 2025

IBM

Introduction to AI and Machine Learning on Google Cloud

March 2026

Google Cloud
